

Process for TVW Water Tap

- Application for Water Service Line received by chairperson of the Water System Advisory Committee.
- Receipt acknowledged back to Owner
- TVW contracts with appropriate provider for the work necessary to provide water service to the Delivery Point (the downstream outlet of the water meter)
- TVW then bills back to the Owner the cost associated with the meter, check valve and associated hook up to the Main Line

In order to ensure the correct operation of the distribution system, TVW may elect to install other valves in the line and, as well, there may be additional costs associated with the installation that are not to be borne by the Owner. TVW bills the Owner only for the cost of providing the Water Service Line as defined in the TVW Water System Rules and Regulations.

Any other service the Owner wishes to be provided downstream of the Delivery Point (such as a hydrant) would be contracted by the Owner.
