

# Bio for Kathy Williams

---

*Candidate for a second term for TVW Board of Directors*

In my 3 years as a member of the TVW Board of Directors I have learned much about TVW operations and the time and dedication of owners involved in maintaining a viable community. I have served as Treasure for the last 2 years and my learning curve was steep and widely supported by others.

I appreciate all the guidance and help I have received from community members. I would like to continue as Treasurer if reelected. Below is the original bio I submitted while running for the Board in 2017.

## **Kathy Williams**

We began coming to Tres Valles West when we bought Lot 58 in 2001 to have a place where we could “camp out” in our horse trailer and bring our horses to escape the Texas summer heat. From the beginning I enjoyed the wonderful country and the trails and beauty of the common area for riding. Several factors led to our purchase of property in TVW - one was the ability to bring an RV (or horse trailer) for the summer months and another was the existence of the water system. Some things have changed but I still appreciate the water system and now realize the hard work and dedication that goes into keeping it running safely.

I am running for the Board of Directors so that I can continue to help in the Property Owners Association. I am currently on the Architectural Review Committee, the Finance Committee and help when possible with the front gate area maintenance.

During our working years, Becky Lane and I had a small company and provided training and consultation to mainly publically funded ambulatory care clinics. In this capacity I worked with clinic staff to improve communication among staff and with clients, increase efficiency in service delivery and improve problem solving skills. A main tenant was to always treat people with kindness and respect. I retired in 2011 but am still active in 2 corporations that own rental properties.

My Board experience includes 3 years on the Board of Directors of a non profit counseling agency and several years as the staff representative to the Board of Directors of a non profit medical clinic.

I believe my experience as a lot owner and occasional visitor and now as a homeowner and more frequent resident has provided me an understanding of issues that impact all of the property owners. If elected to the Board of Directors of TVW I will strive to continue the good work that has been done by present and past Directors, Committee Members and members of the POA.
